

Social Media Privacy

-  Limit who can see your posts and profile
-  Disable location tagging in photos
-  Remove metadata from photos before posting
-  Don't link accounts unnecessarily
-  Be cautious accepting friend requests from strangers
-  Search yourself regularly to see what's public
-  Review app permissions on social platforms

The Truth About "Incognito Mode"

What Incognito/Private Browsing DOES:

- Prevents storing browsing history on YOUR device
- Clears cookies after you close the window

What it DOESN'T do:

- **✗** Hide your activity from websites
- **✗** Prevent tracking by advertisers
- **✗** Hide your IP address
- **✗** Make you anonymous online

For real privacy, you need additional tools.
